

ezlo secure

The hub that always keeps you in control

An always-on solution that works even in the event of a power outage, the Ezlo Secure is a feature-rich control hub that gives consumers a full smart home & security solution in a single control hub.

The Ezlo Secure provides control for Z-Wave and Zigbee devices, while also enabling control of over 27,000 Wi-Fi devices paired to your Amazon Alexa or Google Assistant. Featuring integrations for cameras, lights, sensors, door locks, thermostats, and more, the Ezlo Secure also offers advanced scene creation tools to help you orchestrate your home without lifting a finger.

Ezlo's platform offers local control for faster responsiveness inside the home, and remote access with personalized notifications that keeps you in the know about what's happening when you're away. The Ezlo Secure features Z-Wave's Smart Start for simple system set-up, and Z-Wave S2 security for greater protection, and developers can also take advantage of open APIs to customize their experiences even further.

Key Features

Enables control of Z-Wave and Zigbee devices including lights, thermostats, door locks, sensors, and more, from multiple manufacturers

Control over 27,000 Wi-Fi devices associated with Amazon Alexa or Google Assistant using Ezlo VOI

Built-in backup battery keeps your system running even if the power is out

4G LTE backup keeps you online if the internet connection is lost (with Ezlo Protect Service only)

Built-in siren helps deter intruders—trigger it automatically if key sensors are tripped

Create personalized scenes, including grouped triggers and actions, so home is always the way you like it

Use local control for ultra-fast responsiveness and to keep your system off the cloud

New EzloCast feature lets you control groups of devices—like all your first floor lights—simultaneously

Get remote access and system notifications sent to your iOS or Android phone through the Vera App

Features Z-Wave 700 series technology and S2 framework for enhanced security
